Art Unit: 1616

Claims 1-12, 14, 15, 20-27 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for woman, 773 mg calcium per day and 57 servings per month, does not reasonably provide enablement for men and any number of servings per month or any amount of calcium per day. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to use the invention commensurate in scope with these claims. On page 19 in table 4, applicants disclose the claimed 773 mg per day coupled with 57 servings per month for women. No other number of servings per month, amount of calcium per day, nor men are disclosed.

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-12, 14, 15, 20-27 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 8-10 of copending Application No. 10/827801. Although the conflicting claims are not identical, they are not patentably distinct from each other because the instant claims encompass the claims of '801 regarding the type of food.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented. Per MPEP 804 I.B.1, cited by applicants, the examiner will maintain the instant rejection and will not make one in '801

The abstract of the disclosure is objected to because it does not describe the claimed article of manufacture, but rather methods of use. Correction is required. See MPEP § 608.01(b). Applicants appear to have inadvertently overlooked the objection in the response of 4/4/06.)

No claims allowed.
